SUMMARY

Java Backend Developer with a strong foundation in building scalable backend systems using Spring Boot and Hibernate/JPA. Skilled in designing and consuming RESTful APIs, managing data with MySQL/PostgreSQL, and maintaining clean code with Git.

EDUCATION

Bachelor of Science in Computer Science

Benha University – Faculty of Science

Sept 2020 – 2025

Benha, Egypt

- Graduated with a Bachelor's degree in Computer Science.
- Graduated with a Very Good overall grade.

Work Experience & Training

DevOps Trainee,

Digital Egypt Pioneers Initiative (DEPI) — CLS Learning Solutions

07/2026 – Present

- Gained hands-on experience with **Git, Docker, Jenkins, Kubernetes, Terraform, Ansible, Prometheus, and cloud technologies** through practical labs and projects.
- Worked with **CI/CD workflows** and infrastructure automation.

PROJECTS

Digital Wallet — Backend REST API , | *Java, Spring Boot, PostgreSQL, Redis*

- Built a secure digital wallet REST API using Java 17 & Spring Boot with a clean layered architecture (Controller → Service → Repository)
- Implemented JWT-based authentication and authorization with Spring Security
- Designed PostgreSQL schema with version-controlled migrations using Flyway
- Integrated Redis for caching and reduced API response times
- Applied DTO validation, centralized exception handling, and REST API best practices

Realtime Shipment Tracking System , | *Java, Spring Boot, WebSocket, JWT, PostgreSQL*

- Developed a real-time shipment tracking system using Spring Boot and WebSocket for live updates.
- Implemented secure authentication and authorization using JWT and Spring Security.
- Designed RESTful APIs for shipment management (create, update, track).
- Integrated real-time communication to push shipment status updates instantly to clients.
- Structured the application using layered architecture (Controller, Service, Repository).

Employee Management System [🔗](#) , | *Java, Spring Boot, Spring Data JPA, PostgreSQL*

- Developed a robust RESTful backend for employee management with full CRUD operations.
- Structured the application using layered architecture (Controller – Service – Repository).
- Leveraged Spring Data JPA for efficient data access and optimized database performance.
- Implemented DTO pattern to separate internal entities from API models.
- Applied input validation to ensure data integrity and prevent invalid requests.
- Implemented global exception handling for consistent and reliable error responses.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, REST APIs

Database: MySQL, PostgreSQL

Tools: Postman, IntelliJ, Visual Studio, JUnit

Concepts: OOP, SOLID, Data Structures, Algorithms

DevOps: Linux, Git, GitHub, Docker, Docker Compose, Kubernetes, Ansible, GitHub Actions, Nginx

Languages: Java, C++, HTML, CSS, JavaScript

COURSES & CERTIFICATIONS

- Introduction to Java and Object-Oriented Programming — Coursera
- Master Spring Boot 3 & Spring Framework 6 with Java — Udemy (Chad Darby)

LANGUAGES

Arabic: Native, **English:** Good
